### AMENDMENT TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

#### Listing of Claims

---

Claims 1-13 (Cancelled)

14. (Previously Presented) A system for viewing data comprising:  
a wearable camera worn by a human operator, said camera capable of viewing at least a substantial portion of a field of view of the operator, and capable of viewing visual markers proximate to objects within the field of view of the operator;  
a wearable computer system having logic capable of detecting one or more visual markers within the field of view of the camera, determining an identifier associated with the marker, and wirelessly transmitting the identifier to a computer network and wirelessly receiving data associated with the identifier from the computer network;  
a memory storage in communication with the network containing the information associated with the markers; and  
a wearable display.
15. (Original) The system of claim 14 wherein the wearable display is a see-through display permitting simultaneous viewing of information on the display and of objects within the field of view of the operator.
16. (Previously Presented) The system of claim 15, wherein data associated with the identifier is superimposed on the see-through display on a real image of the field of view of the operator.
17. (Previously Presented) The system of claim 14, wherein the memory storage further comprises at least one database storing information associated with the marker.

18. (Currently Amended) The system of claim 14, wherein the memory storage further comprises at least one database storing information associated with a profile of the operator.

19. (Previously Presented) The system of claim 18, wherein the wearable computer comprises logic capable of detecting one or more visual markers within the field of view of the camera based on a predetermined amount of time that the one or more visual markers are within the field of view of the camera.

20. (Currently Amended) The system of claim 19, wherein the predetermined amount of time is based on ~~an~~ the operator profile stored in the memory storage.
